- Ability to manage multiple project tasks with changing priorities & tight deadlines
- Experience in E-Commerce domain and comfortable in handling the business complexities involved in implementation.
- Contributed effectively to the team as a development resource
- Open Source Contributions
    - Game using **native JavaScript**: numberShuffle, MarblePuzzle.
    - Generic customizable code for shortening the URL's using PHP, MongoDB, Javascript and hosted in the cloud for general use: SHORTENURL
- Contribution to open source : github.com/kartheekgj/
- Technical Blog : opendummies

Technical Skills

Strengths	JavaScript, JQuery,OOJS, HTML,CSS PHP, MySQL.
Frameworks	OPENUI5/ SAPUI5, AngularJs, EmberJs, NodeJs, RequireJs, UnderscoreJS, HandleBarJs.
Operating System	Windows, Linux(Ubuntu)
Scripting Languages	JavaScript, PHP
Databases	MySQL, MongoDB, Redis
VersionControl	GIT, SVN, Tortoise, TFS
IDEs	NotePad++,Sublime, NetBeans
Other areas of Interest	Data Warehousing, Data Mining

Professional Experience

Cognizant Technology Solutions   Aug '14 – till date

Client – Dutesche Borse Group
Environment: Apache/ Tomcat

Technologies: OPENUI5, JQuery, JavaScript, CSS

Description: Development of Application for a client Dutesche Borse Group which is an intranet website used for the employees internally and need to be customizable for I18N. Using the latest Fiori standards and OPENUI5.

Key Responsibilities:

- Understanding the requirement and constructing the website. Working with the new Javascript Framework OPENUI5
- Everyday progress is the key.
- Optimizing the code where ever required.
- Creating a single page application and coding according to SAPUI5 standards.

Client – BMW
Environment: Apache/ Tomcat

Technologies: AngularJs, ng-grid, JQuery, JavaScript, HTML, CSS

Description: Development of Application for a client BMW which is an intranet website used for the employees internally and need to be customizable for I18N since the same template site is used in many other countries and should be easily configure the custom language labels

Key Responsibilities:

- Creating custom directives, creating services and other component skeleton to make the code reusable while development.
- Development of the website and code as per the standards of BMW
- Optimizing the code where ever required.
- Customizing the code to use the i18N to reuse the templates instead of creating new for the other regions.

Client – Hoegh

Environment: WebLogic/Apache

Technologies: Jquery, Javascript, Jquery DataTables, JqueryUI, HTML, CSS

Description: Development of Application for a client which is a conversion of a native application to a web application using Jquery,JqueryUI, Jquery DataTables, HTML, CSS

Key Responsibilities:

- Creating modules which are reusable for the whole project and easy to integrate with the java application
- Creating innovative modules by using various new features like div editable(HTML5) for making application take the look of native application
- Helping java developers to integrate with the application and scaling up the JavaScript code.
- Finding the places where the existing code can be converted to OOJS to make them more reusable components and optimize the code if possible.

Client – British Gas

Project 1:

Environment: Apache/phoneGap.

Technologies: UnderscoreJs, Jquery, JSON, HTML, CSS3.

Description: Development of Application which helps the British Gas Users to use certain features of the product. Making the application more responsive and making it compatible across all devices

Key Responsibilities:

- Creating the application compatible for all the devices (cross device compatibility)
- Using Underscore Js for the front end implementation instead of HTML to make the HTML more secure and modular

Project 2 :

Environment: Adobe CQ5/NodeJs server.

Technologies: AngularJS, EmberJs(Ember CLI), Bootstrap Css, Brocolli, HandlerBarJs, Git.

Description: Development of Application which is a redesign of existing application using new technologies like Ember Js, HandleBarJs and Bootstrap Css.
Key Responsibilities:

- Created a new EmberCli application for moveHome journey using HandleBarJs, EmberCli and pickadate Js Ember addon
- Responsible for using 3rd party tools and customizing it.
- Having client interaction and getting requirement.

KRDS Pvt LTD   **Mar '14 – Aug '14**

 As a part of the development of a product with name Feedizer lead Emilien where I work with latest technologies like Angular and RequireJs also with PHP mysql and javascript under KRDS pvt Ltd.

Environment: Apache/Nginx Server. Designed to be used on Facebook Apps

Technologies: JQuery, RequireJs, AngularJS, HTML, CSS, PHP, Facebook SDK, MySQL, Internal MVC framework.

Description: Development of Application which run on the Facebook Application which renders page in an iframe. Working with internal PHP framework development of French based Projects which involved Internationalization (i18n).

Key Responsibilities:

- Creating Project based on the requirement with best possible solution using PHP and JQuery
- Introduced RequireJs which can be used for SinglePage web Application
- Proejcts involves many areas where photo cropping and photo of users are involved • Creating tables and structure of the database for each to get the data recorded
- Capturing Notification and user crawling by capturing data.
- Involves Internationalization so making sure that the data is dynamic rather than static
- Involved MySQL quries to display the data
- Creating cron jobs to generate winner list if the application involves gaming
- Testing and quick Bug fixing of MySQL programs
- Regression testing of all batch applications
- As a team member for this project, was involved in the analysis, design, development and testing of critical modules

BookMyShow   **Jun '12 – Mar '14**

Environment: Apache.

Technologies: Javascript, JQuery, REST API, GIT, NodeJs, AngularJS, PHP, MySQL, OAUTH, MongoDB, CodeIgnitor.

Description: Working with India's #1 Ticketing Website which involved a lot of traffic more than a 10million hits a day. Making sure that data is correctly and displayed properly and website is loaded as soon as possible.

.Key Responsibilities

- Involved in the development of Bookmyshow.com and bd.bookmyshow.com (cricket worldcup2014)
- Involved in creating social logins and many other features where OAUTH is required
- Integrated Facebook with the website using OAUTH 2.0. Worked with Facebook Notification API, Open Graph Api.
- Managing the Project Modules by Scheduling.
- Maintaining the Website.
- Managing and deploying the website in Live Environment.
- Worked on ICC T20 World Cup 2014 (http://bd.bookmyshow.com).
- Worked with MongoDB and NodeJs
